Weilerbach, 16.12.02 – HW/TP

**Information sheet no. VI 58/02**

**TRAM SILENCE User Report**

Dear Sirs,

Enclosed you will find a copy of an article from the periodical, the "Eisenbahningenieur" ("Railway Engineer").

It is an article, which was produced at our request, in co-operation with the transport authority in Kassel, by a marketing agency, which has frequently written articles for FUCHS PETROLUB. In it the complex problem of "noise annoyance caused by rail traffic" is described very vividly and the very favourable results obtained in combating these noises are reported in detail.

We are sure that this article will also be particularly valuable for use as information and as a testimonial for your customers, who are certainly confronted with similar problems.

We will find out if it possible to have a special reprint, which we could then also make available to you in colour. The enclosed black and white copy is intended as preliminary advance information. Naturally if you wish you can also have coloured copies in advance.

Yours faithfully,

FUCHS LUBRITECH GMBH

b.o.

Harald Willrich  
Head of Technical Services
